

- Better topo support
- Photo geotagging/embedding
- Various modes of transportation
- Garmin Adventures
- Birdseye imagery
- Reads maps off GPS
- Has world base map

Multiple routes in one file

Integration with Google Earth Montaña Bitterroot FRocky Mountains Placemark2 6 I-94 and I-90 Placemark3 Salmon River Mountains US 89 and Grand Loop & Idaho Wyoming Placemark1

Integration with Google Earth

- Import .kml and .kmz from Google Earth and Google Maps
- Import .jpg and .jpeg photos
- Imports exports all Garmin formats, never a problem with backward-compatible files
- Exports .gpx

Waypoints - manipulation

- Instant view of rally waypoints, no need for 'helper' programs
- Manipulate waypoints inside BC
 - Rename
 - Change symbol
 - Sort
 - Add comments, data
 - Add point values, then sort

To the Later

Third party maps

Third party maps

Reads maps off GPS

- You can travel without a laptop
- Use any computer available
- Up and running quickly in case of computer failure
- Completely independent of Internet access
- Everything on your GPS & data card

Garmin Adventures

Contains world basemap

Interaction with software developers

Database structure

- Not files and folders
- Libraries, My Collection
- List Folders, Lists
- Never lose a waypoint
- Have all waypoints readily available
- Easily find waypoint by zooming in
- Lists all waypoints NOT used in route, useful to see if you have missed one

- Click on start, click on intermediate stops, click on finish
- Use 'insert' tool to add waypoints
- Can re-order waypoints
- Remove waypoint from route, waypoint remains in waypoint list- never lose a waypoint!

- Record track in GPS (where you went)
- Analyse your trip:
 - How long ramp to ramp gas stop
 - How long each bonus stop
 - Average speed charts
- Capacity to record tracks depends on GPS-500 to 10,000 trackpoints

Track Analysis

Track Analysis

Add stop time ('layover')
